**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The response filed October 9, 2002 has been entered and made of record as paper no. 7.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 27-43 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Sato (US-4,611,236) in view of Tran et al (US-5,780,883), both of record.

Sato discloses in figures 7 and 9 a gate array architecture including a semiconductor substrate having a plurality of N-type diffusion regions and P-type diffusion regions, the diffusion regions having partially overlying landing sites (3G) to form relatively-sized N-type and P-type transistors in which rows of smaller diffusion regions (BC) are followed by rows of larger diffusion regions (BCL), the relatively sized P-type diffusions regions (QP12 and QP13) being substantially adjacent. Tran et al discloses that the landing sites (54) can be formed of polysilicon. Therefore, it would have been obvious to one of ordinary skill in the art to use polysilicon landing sites in Sato on both N-type and P-type transistors to form a basic cell as taught by Tran et al.

Applicant's arguments filed October 9, 2002 have been fully considered but they are not persuasive.

Sato and Tran et al have been carefully reviewed. The Examiner does not believe that this case is in condition for allowance.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Examiner Ngan Ngo at telephone number (703) 308-4938. The fax number for the Art unit is (703) 308-7722.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956.
